# Heroes Welcome.

We are excited to announce that the Montana Public Health Institute is hosting a discussion and virtual reality demonstration on how to save a life by reversing an opioid overdose. We hope that you will find the time to join us for this unique virtual event and learn how local agencies are collaborating to combat the opioid epidemic in our community.

Walmart has developed a virtual reality tool to deliver a powerful experiential element to naloxone and overdose reversal trainings. Montana Public Health Institute, CADCA and Walmart have partnered to bring key insights from local leaders directly to community members with this brief one-hour webinar event. As many communities face escalating overdose rates, it has never been more important to know how to save a life.
